

## **VISION**

To become an identified development center for high quality professionals in the area of Computer Science and Engineering serving the societal needs.

## **MISSION**

**DM1:** To train the stakeholders in the area of Computer Science and Engineering.

**DM2:** To organize innovative technical training and leadership activities to groom professionals.

**DM3:** To provide quality resources towards research and development on Artificial Intelligence.

## **PO'S**

**PO1:** Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO6:** The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**PO7:** Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO8:** Ethics Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**PO9:** Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO11 :** Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12 :** Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## **PEO's**

**PEO1:** Apply engineering knowledge in the chosen fields with ethics and professional values.

**PEO2:** Continue to learn and solve real life problems inculcate with interdisciplinary teams.

**PEO3:** Face the challenges in industry and pursue higher studies.

## **PSO's**

**PSO 1:** Develop computer applications by applying Artificial Intelligence.

**PSO 2:** Demonstrate the skills in the field of Networks, Web-Design, Cloud Computing and Data Analytics.

## **ABOUT DEPARTMENT**

The Department of Computer Science and Engineering at DNR CET was established in 2010. The department offers Undergraduate course B.Tech with 120 seats and also offers post graduation of M.Tech in Computer Science & Engineering with 18 seats.

The Department has highly qualified and experienced faculty with a minimum qualification of M.Tech. The Department of CSE has sophisticated computing facilities like splendid computer labs with latest and Facilitate and equipped configuration systems. The Department has conducted various seminars and workshops to inculcate latest technologies to the students and to meet the industrial requirements.

Computer engineers work in almost every industry starting from health care and gaming to banking and online shopping. They might find themselves in a variety of environments in academia, research, industry, government, private and business organizations—analyzing problems for solutions, for mutating and testing, using advanced communications, or working in teams for software development.

## **ADMINISTRATOR MESSAGE**

**Sri.G SATYANARAYANA RAJU**  
**Hon.Secretary & Correspondant**  
**DNR Association**

**"Education is the most powerful weapon which you can use to change the world."**

Your power to choose the direction of your life allows you to reinvent yourself, to change your future, and to powerfully influence the rest. Leadership and learning are indispensable to each other. The only person who is educated is, the one who know how to learn and change. You are the "Change" to yourself and your future. You are welcome to DNR College Of Engineering & Technology, one of the most prestigious colleges for engineering and technology, which is affiliated to JNTUK, Kakinada. The institution provides you the space to ignite your imagination and inspire you to love learning.

## **PRINCIPAL MESSAGE**

**Dr.M.Anjan Kumar**  
**M.E.,Ph.D.,MIGS,MIS,MISTE,MIRC**  
**PRINCIPAL**

Technological enlargement in a country chiefly depends on how far the Engineers are going to put their knowledge into practice Strong elementary concepts with innovative mindset is the requirement of the present day Engineers. Our main slogan in educating the budding Engineers is to lay a very strong foundation for the future circumstantial adaptation in the practical field Strengthening the fundamental concepts and exposure to the current development and future trend is our main aim in teaching in the Technological environment as there is a tremendous boom for the practical and research orient education in the future.

## **HOD MESSAGE**

**Sri.D D D SURIBABU**  
**M.Tech.,(Ph.D)**  
**HOD & Assoc.Prof.**

The DNR College Of Engineering & Technology is helping students to reshape their future to become a valuable asset for the nation. We are committed to academic excellence in the fields of Computer Science and Engineering, leading to develop students through academia and industry linkages.The students of the computer science and engineering are highly demanded by the recruiters of the top companies to enhance their employability skills through Industry Institute Collaboration.

Computer Science is a relatively young discipline of research. With computers as smart tools to help us think, we have to rely less on guessing. We can support our decisions by data. This is becoming more and more important in our increasingly digital economies. Artificial Intelligence is an area that has gained much attention recently, not only within the research community but also in our daily lives. For example think about self-driving cars, AI-driven medical diagnostics and personal health, face identification, or natural language understanding etc. Another budding area of research is Data Science where we use computational tools to gather data, filter them, separate noise from useful information, and create knowledge, from which we can make better decisions and build smarter, enabling tools for our daily lives and to support our professional endeavours.

**Workshops/Seminars/Training Programs**

**WORKSHOP-1**

- A Two days program on “Artificial Intelligence” conducted on 02-08-2021 to 10-08-2021.
- **Mr.A.Siva Rama rao**, is delivered a lecture on Artificial Intelligence.
- Students and faculty participated in the workshop from the Department of Computer Science & Engineering.
- **Mr. B. Nandan Kumar**, Assistant Professor in Computer Science and Engineering, DNR CET acts as a Coordinator to the event.

**SEMINAR THEME**

In general, AI systems work by ingesting large amounts of labeled training data, analyzing the data for correlations and patterns, and using these patterns to make predictions about future states. In this way, a chatbot that is fed examples of text can learn to generate lifelike exchanges with people, or an image recognition tool can learn to identify and describe objects in images by reviewing millions of examples. New, rapidly improving AI techniques can create realistic text, images, music and other media.

AI programming focuses on cognitive skills that include the following:

- **Learning.** This aspect of AI programming focuses on acquiring data and creating rules for how to turn it into actionable information. The rules, which are called *algorithms*, provide computing devices with step-by-step instructions for how to complete a specific task.
- **Reasoning.** This aspect of AI programming focuses on choosing the right algorithm to reach a desired outcome.
- **Self-correction.** This aspect of AI programming is designed to continually fine-tune algorithms and ensure they provide the most accurate results possible.
- **Creativity.** This aspect of AI uses neural networks, rules-based systems, statistical methods and other AI techniques ideas.

**WORKSHOP-3**

- A One day program Guest Lecture on “Operating Systems” conducted on 27-09-2021.
- **Mr.Surya Teja**, is delivered a lecture on Operating Systems.

Operating System Tutorial provides the basic and advanced concepts of operating system . Our Operating system tutorial is designed for beginners, professionals and GATE aspirants. We have designed this tutorial after the completion of a deep research about every concept.

The content is described in detailed manner and has the ability to answer most of your queries. The tutorial also contains the numerical examples based on previous year GATE questions which will help you to address the problems in a practical manner.

Operating System can be defined as an interface between user and the hardware. It provides an environment to the user so that, the user can perform its task in convenient and efficient way. The Operating System Tutorial is divided into various parts based on its functions such as Process Management, Process Synchronization, Deadlocks and File Management.
