Course	Operating Systems	Year / Semester	III / I
Topic	Palm-Sized PCs to Open-Source OS Communities	Innovative Method Chosen	Brainstorming

Brainstorming:

Brainstorming is a group creativity technique that is often used to find a solution to a specific problem. This is accomplished by gathering and recording new ideas from team members in a free-flowing manner. Brainstorming sessions are usually made up of a handful of core team members, and typically are led by a director or facilitator.

Palm-Sized PCs to Open-Source OS Communities is an important topic in Operating Systems. The activity of group discussion makes it easier to learn the topic of Palm-Sized PCs to Open-Source OS Communities. It helps the students to get a comprehensive knowledge on this topic. Students think individually and share their ideas with their classmates, which improves creative thinking and oral communication skills

Details of the Implementation:

At the end of the class, the students were asked to think individually about the Palm-Sized PCs to Open-Source OS Communities concept as discussed in the class for 5 minutes. Then the students shared their understanding of the concepts in that topic. Finally, each group of students shared about the particular concept to the entire Class. The key terms of Palm-Sized PCs to Open-Source OS Communities are shared by the students through this activity are depicted in the figure 1. This activity shows whether the students are able to understand the concept and their involvement in the particular class.
