**II Year I Semester**

**NUMERICAL METHODS AND TRANSFORM TECHNIQUES(BT24BS2103)**

**Course Objectives:**

- To elucidate the different numerical methods to solve nonlinear algebraic equations
- To disseminate the use of different numerical techniques for carrying out numerical integration.
- To furnish the learners with basic concepts and techniques at plus two level to lead them into advanced level by handling various real world applications.

**Course Outcomes:**

1. Evaluate the approximate roots of polynomial and transcendental equations by different algorithms. Apply Newton's forward & backward interpolation and Lagrange's formulae for equal and unequal intervals (L3)
2. Apply numerical integral techniques to different Engineering problems. Apply different algorithms for approximating the solutions of ordinary differential equations with initial conditions to its analytical computations (L3)
3. Apply the Laplace transform for solving differential equations (L3)
4. Find or compute the Fourier series of periodic signals (L3)
5. Know and be able to apply integral expressions for the forwards and inverse Fourier transform to a range of non-periodic waveforms (L3)

**UNIT – I: Iterative Methods:**

Introduction – Solutions of algebraic and transcendental equations: Bisection method – Secant method – Method of false position – Iteration method – Newton-Raphson method (Simultaneous Equations)

**Interpolation:** Newton's forward and backward formulae for interpolation – Interpolation with unequal intervals – Lagrange's interpolation formula

**UNIT – II: Numerical integration, Solution of ordinary differential equations with initial conditions:**

Trapezoidal rule– Simpson's 1/3<sup>rd</sup> and 3/8<sup>th</sup> rule– Solution of initial value problems by Taylor's series– Picard's method of successive approximations– Euler's method –Runge-Kutta method (second and fourth order) – Milne's Predictor and Corrector Method.

**UNIT –III: Laplace Transforms:**

Definition of Laplace transform - Laplace transforms of standard functions – Properties of Laplace Transforms – Shifting theorems–Transforms of derivatives and integrals – Unit step

**D.N.R. COLLEGE OF ENGINEERING & TECHNOLOGY(Autonomous)  
BALUSUMUDI, BHIMAVARAM, W.G. Dist., A.P., PIN-534 202**

**DEPARTMENT OF MECHANICAL ENGINEERING**

function – Dirac's delta function – Inverse Laplace transforms – Convolution theorem (with out proof).

Applications: Solving ordinary differential equations (initial value problems) and integro differential equations using Laplace transforms.

**UNIT – IV: Fourier series:**

Introduction– Periodic functions – Fourier series of periodic function –Dirichlet's conditions – Even and odd functions –Change of interval– Half-range sine and cosine series.

**UNIT – V: Fourier Transforms:**

Fourier integral theorem (without proof) – Fourier sine and cosine integrals – Infinite Fourier transforms – Sine and cosine transforms – Properties– Inverse transforms – Convolution theorem (without proof) – Finite Fourier transforms.

**UNIVERSAL HUMAN VALUES – UNDERSTANDING HARMONY & ETHICAL  
HUMAN CONDUCT (BT24HS2101)**

**Course Objectives:**

- To help the students appreciate the essential complementary between 'VALUES' and 'SKILLS' to ensure sustained happiness and prosperity which are the core aspirations of all human beings.
- To facilitate the development of a Holistic perspective among students towards life and profession as well as towards happiness and prosperity based on a correct understanding of the Human reality and the rest of existence. Such holistic perspective forms the basis of Universal Human Values and movement towards value-based living in a natural way.
- To highlight plausible implications of such a Holistic understanding in terms of ethical human conduct, trustful and mutually fulfilling human behaviour and mutually enriching interaction with Nature.

**Course Outcomes:**

- Define the terms like Natural Acceptance, Happiness and Prosperity (L1, L2)
- Identify one's self, and one's surroundings (family, society nature) (L1, L2)
- Apply what they have learnt to their own self in different day-to-day settings in real life (L3)
- Relate human values with human relationship and human society. (L4)
- Justify the need for universal human values and harmonious existence (L5)
- Develop as socially and ecologically responsible engineers (L3, L6)

**Course Topics**

The course has 28 lectures and 14 tutorials in 5 modules. The lectures and tutorials are of 1-hour duration. Tutorial sessions are to be used to explore and practice what has been proposed during the lecture sessions.

The Teacher's Manual provides the outline for lectures as well as practice sessions. The teacher is expected to present the issues to be discussed as propositions and encourage the students to have a dialogue.

**UNIT I** Introduction to Value Education (6 lectures and 3 tutorials for practice session)

Lecture 1: Right Understanding, Relationship and Physical Facility (Holistic Development and the Role of Education)

Lecture 2: Understanding Value Education

Tutorial 1: Practice Session PS1 Sharing about Oneself

Lecture 3: self-exploration as the Process for Value Education

**DEPARTMENT OF MECHANICAL ENGINEERING**

Lecture4: Continuous Happiness and Prosperity – the Basic Human Aspirations

Tutorial 2: Practice Session PS2 Exploring Human Consciousness

Lecture 5: Happiness and Prosperity – Current Scenario

Lecture 6: Method to Fulfill the Basic Human Aspirations

Tutorial 3: Practice Session PS3 Exploring Natural Acceptance

**UNIT II**

Harmony in the Human Being (6 lectures and 3 tutorials for practice session)

Lecture 7: Understanding Human being as the Co-existence of the self and the body.

Lecture 8: Distinguishing between the Needs of the self and the body

Tutorial 4: Practice Session PS4 Exploring the difference of Needs of self and body.

Lecture 9: The body as an Instrument of the self

Lecture 10: Understanding Harmony in the self

Tutorial 5: Practice Session PS5 Exploring Sources of Imagination in the self

Lecture 11: Harmony of the self with the body

Lecture 12: Programme to ensure self-regulation and Health

Tutorial 6: Practice Session PS6 Exploring Harmony of self with the body

**UNIT III**

Harmony in the Family and Society (6 lectures and 3 tutorials for practice session)

Lecture 13: Harmony in the Family – the Basic Unit of Human Interaction

Lecture 14: 'Trust' – the Foundational Value in Relationship

Tutorial 7: Practice Session PS7 Exploring the Feeling of Trust

Lecture 15: 'Respect' – as the Right Evaluation

Tutorial 8: Practice Session PS8 Exploring the Feeling of Respect

Lecture 16: Other Feelings, Justice in Human-to-Human Relationship

Lecture 17: Understanding Harmony in the Society

Lecture 18: Vision for the Universal Human Order

Tutorial 9: Practice Session PS9 Exploring Systems to fulfil Human Goal

**UNIT IV**  
session)

Harmony in the Nature/Existence (4 lectures and 2 tutorials for practice

Lecture 19: Understanding Harmony in the Nature

Lecture 20: Interconnectedness, self-regulation and Mutual Fulfilment among the Four Orders of Nature

Tutorial 10: Practice Session PS10 Exploring the Four Orders of Nature

Lecture 21: Realizing Existence as Co-existence at All Levels

Lecture 22: The Holistic Perception of Harmony in Existence

Tutorial 11: Practice Session PS11 Exploring Co-existence in Existence.

**D.N.R. COLLEGE OF ENGINEERING & TECHNOLOGY(Autonomous)  
BALUSUMUDI, BHIMAVARAM, W.G. Dist., A.P., PIN-534 202**

**DEPARTMENT OF MECHANICAL ENGINEERING**

**UNIT V** Implications of the Holistic Understanding – a Look at Professional Ethics (6 lectures and 3 tutorials for practice session)  
Lecture 23: Natural Acceptance of Human Values  
Lecture 24: Definitiveness of (Ethical) Human Conduct  
Tutorial 12: Practice Session PS12 Exploring Ethical Human Conduct  
Lecture 25: A Basis for Humanistic Education, Humanistic Constitution and Universal Human Order  
Lecture 26: Competence in Professional Ethics  
Tutorial 13: Practice Session PS13 Exploring Humanistic Models in Education  
Lecture 27: Holistic Technologies, Production Systems and Management Models-Typical Case Studies  
Lecture 28: Strategies for Transition towards Value-based Life and Profession  
Tutorial 14: Practice Session PS14 Exploring Steps of Transition towards Universal Human Order

Practice Sessions for UNIT I – Introduction to Value Education

PS1 Sharing about Oneself

PS2 Exploring Human Consciousness

PS3 Exploring Natural Acceptance

Practice Sessions for UNIT II – Harmony in the Human Being

PS4 Exploring the difference of Needs of self and body

PS5 Exploring Sources of Imagination in the self

PS6 Exploring Harmony of self with the body

Practice Sessions for UNIT III – Harmony in the Family and Society

PS7 Exploring the Feeling of Trust

PS8 Exploring the Feeling of Respect

PS9 Exploring Systems to fulfil Human Goal

Practice Sessions for UNIT IV – Harmony in the Nature (Existence)

PS10 Exploring the Four Orders of Nature

PS11 Exploring Co-existence in Existence

Practice Sessions for UNIT V – Implications of the Holistic Understanding – a Look at Professional Ethics

PS12 Exploring Ethical Human Conduct

PS13 Exploring Humanistic Models in Education

PS14 Exploring Steps of Transition towards Universal Human Order

**Mode of Conduct:**

Lecture hours are to be used for interactive discussion, placing the proposals about the topics at hand and motivating students to reflect, explore and verify them.

Tutorial hours are to be used for practice sessions.

While analyzing and discussing the topic, the faculty mentor's role is in pointing to essential elements to help in sorting them out from the surface elements. In other words, help the students explore the important or critical elements.

In the discussions, particularly during practice sessions (tutorials), the mentor encourages the student to connect with one's own self and do self-observation, self-reflection and self-exploration.

Scenarios may be used to initiate discussion. The student is encouraged to take up "ordinary" situations rather than "extra-ordinary" situations. Such observations and their analyses are shared and discussed with other students and faculty mentor, in a group sitting.

Tutorials (experiments or practical) are important for the course. The difference is that the laboratory is everyday life, and practical are how you behave and work in real life. Depending on the nature of topics, worksheets, home assignment and/or activity are included. The practice sessions (tutorials) would also provide support to a student in performing actions commensurate to his/her beliefs. It is intended that this would lead to development of commitment, namely behaving and working based on basic human values.

**D.N.R. COLLEGE OF ENGINEERING & TECHNOLOGY(Autonomous)  
BALUSUMUDI, BHIMAVARAM, W.G. Dist., A.P., PIN-534 202**

**DEPARTMENT OF MECHANICAL ENGINEERING**

It is recommended that this content be placed before the student as it is, in the form of a basic foundation course, without including anything else or excluding any part of this content. Additional content may be offered in separate, higher courses. This course is to be taught by faculty from every teaching department, not exclusively by any one department. Teacher preparation with a minimum exposure to at least one 8-day Faculty Development Program on Universal Human Values is deemed essential.

**THERMO DYNAMICS  
(BT24ME2101)**

**Course Objectives**

- Familiarize concepts of heat, work, energy and governing rules for conversion of one form to other.
- Explain relationships between properties of matter and basic laws of thermodynamics.
- Teach the concept of entropy for identifying the disorder and feasibility of a thermodynamic process.
- Introduce the concept of available energy for maximum work conversion.
- Provide fundamental concepts of Refrigeration and Psychrometry.

**Unit - I**

Introduction: Basic Concepts : System, boundary, Surrounding, control volume, Universe, Types of Systems, Macroscopic and Microscopic viewpoints, Concept of Continuum, Thermodynamic Equilibrium, State, Property, Process, Cycle – Reversibility – Quasi static Process, Irreversible Process, Causes of Irreversibility

**Unit -II**

Energy in State and in Transition, Types, Work and Heat, Point and Path function. Zeroth Law of Thermodynamics – PMM-I, Joule's Experiment – First law of Thermodynamics and applications. Limitations of the First Law – Enthalpy, Thermal Reservoir, Heat Engine, Heat pump, Parameters of performance.

**Unit - III**

Second Law of Thermodynamics, Kelvin-Planck and Clausius Statements and their Equivalence / Corollaries, PMM-II, Carnot's principle, Carnot cycle and its specialties, Thermodynamic scale of Temperature, Clausius Inequality, Entropy, Principle of Entropy Increase – Energy Equation, Availability and Irreversibility – Thermodynamic Potentials, Gibbs and Helmholtz Functions, Maxwell Relations – Elementary Treatment of the Third Law of Thermodynamics.

**Unit - IV**

Pure Substances, P-V-T- surfaces, T-S and h-s diagrams, Mollier Charts, Phase Transformations – Triple point at critical state properties during change of phase, Dryness Fraction – Clausius – Clapeyron Equation Property tables. Mollier charts – Various Thermodynamic processes and energy Transfer – Steam Calorimetry.

**Unit – V**

Introduction to Refrigeration: working of Air,Vapour compression,VCR system Components, COP Refrigerants.

Introduction to Air Conditioning: Psychrometric properties & processes – characterization of sensible and latent heat loads – load concepts of SHF.

**D.N.R. COLLEGE OF ENGINEERING & TECHNOLOGY(Autonomous)  
BALUSUMUDI, BHIMAVARAM, W.G. Dist., A.P., PIN-534 202**

**DEPARTMENT OF MECHANICAL ENGINEERING**

Requirements of human comfort and concept of effective temperature- comfort chart – comfort air conditioning, and load calculations.

**Course Outcomes:**

| COs | Statements  | Blooms Level |
|-----|---|--------------|
| CO1 | Explain the importance of thermodynamic properties related to conversion of heat energy into work.                      | L3           |
| CO2 | Apply the Zeroeth and First Law of Thermodynamics.  | L3           |
| CO3 | Understand Second Law of Thermodynamics.  | L2           |
| CO4 | Analyze the Mollier charts, T-S and h-s diagrams, Steam calorimetry, Phase Transformations                              | L4           |
| CO5 | Evaluate the COP of refrigerating systems and properties, processes of psychrometry and sensible and latent heat loads. | L5           |

**MECHANICS OF SOLIDS(BT24ME2102)**

**Course Objectives:** The objectives of the course are to

- Understand the behavior of basic structural members subjected to uni axial and bi axial loads.
- Apply the concept of stress and strain to analyse and design structural members and machine parts under axial, shear and bending loads, moment and torsional moment.
- Students will learn all the methods to analyse beams, columns, frames for normal, shear, and torsion stresses and to solve deflection problems in preparation for the design of such structural components. Students are able to analyse beams and draw correct and complete shear and bending moment diagrams for beams.
- Students attain a deeper understanding of the loads, stresses, and strains acting on a structure and their relations in the elastic behavior
- Design and analysis of Industrial components like pressure vessels.

**UNIT- I**

**SIMPLE STRESSES & STRAINS :** Elasticity and plasticity – Types of stresses & strains–Hooke’s law – stress – strain diagram for mild steel – Working stress – Factor of safety – Lateral strain, Poisson’s ratio & volumetric strain – Bars of varying section – composite bars – Temperature stresses- Complex Stresses - Stresses on an inclined plane under different uniaxial and biaxial stress conditions - Principal planes and principal stresses - Mohr’s circle - Relation between elastic constants, Strain energy – Resilience – Gradual, sudden, impact and shock loadings.

**UNIT-II**

**SHEAR FORCE AND BENDING MOMENT :**Definition of beam – Types of beams – Concept of shear force and bending moment – S.F and B.M diagrams for cantilever, simply supported and overhanging beams subjected to point loads, u.d.l, uniformly varying loads and combination of these loads – Point of contra flexure – Relation between S.F., B.M and rate of loading at a section of a beam.

**UNIT-III**

**FLEXURAL STRESSES :**Theory of simple bending, Derivation of bending equation, Determination of bending stresses – section modulus of rectangular, circular, I and T sections– Design of simple beam sections.

**SHEAR STRESSES:** Derivation of formula – Shear stress distribution across various beams sections like rectangular, circular, triangular, I and T sections.

**UNIT-IV**

**DEFLECTION OF BEAMS :**Bending into a circular arc – slope, deflection and radius of curvature – Differential equation for the elastic line of a beam – Double integration and Macaulay’s methods – Determination of slope and deflection for cantilever and simply

**D.N.R. COLLEGE OF ENGINEERING & TECHNOLOGY(Autonomous)

**DEPARTMENT OF MECHANICAL ENGINEERING**

supported beams subjected to point loads, UDL and UVL. Mohr's theorem and Moment area method – application to simple cases.

**TORSION:** Introduction-Derivation- Torsion of Circular shafts- Pure Shear-Transmission of power by circular shafts, Shafts in series, Shafts in parallel.

**UNIT– V**

**THIN AND THICK CYLINDERS:** Thin seamless cylindrical shells – Derivation of formula for longitudinal and circumferential stresses – hoop, longitudinal and volumetric strains – changes in dia, and volume of thin cylinders– Thin spherical shells. Wire wound thin cylinders. Lamé's equation – cylinders subjected to inside & outside pressures – compound cylinders.

**COLUMNS:**

Buckling and Stability, Columns with Pinned ends, Columns with other support Conditions, Limitations of Euler's Formula, Rankine's Formula

**D.N.R. COLLEGE OF ENGINEERING & TECHNOLOGY(Autonomous)  
BALUSUMUDI, BHIMAVARAM, W.G. Dist., A.P., PIN-534 202**

**DEPARTMENT OF MECHANICAL ENGINEERING**

**Course Outcomes:**

| <b>COs</b> | <b>Statements</b>  | <b>Blooms Level</b> |
|------------|--|---------------------|
| CO1        | Learn all the methods to analyze beams, columns, frames for normal, shear, and torsion stresses and to solve deflection problems in preparation for the design of such structural components | L1                  |
| CO2        | Analyse beams and draw correct and complete shear and bending moment diagrams for beams.   | L4                  |
| CO3        | Apply the concept of stress and strain to analyze and design structural members and machine parts under axial, shear and bending loads, and moments.   | L3                  |
| CO4        | Model & Analyze the behavior of basic structural members subjected to various loads  | L4                  |
| CO5        | Design and analysis of Industrial components like pressure vessels.  | L6                  |

**DEPARTMENT OF MECHANICAL ENGINEERING**

**II Year-I Semester**

| 3 | 0 | 0 | 3 |

**MATERIAL SCIENCE & METALLURGY (BT24ME2103)**

**Course Objective:**

- Understand the crystalline structure of different metals and study the stability of phases in different alloy systems.
- Study the behavior of ferrous and non ferrous metals and alloys and their application in different domains
- Able to understand the effect of heat treatment, addition of alloying elements on properties of ferrous metals.
- Grasp the methods of making of metal powders and applications of powder metallurgy
- Comprehend the properties and applications of ceramic, composites and other advanced methods

**UNIT– I**

**Structure of Metals and Constitution of alloys:** Crystallization of metals, Packing Factor - SC, BCC, FCC & HCP-line density, plane density. Grain and grain boundaries, effect of grain boundaries– determination of grain size. Imperfections, Slip and Twinning.

Necessity of alloying, types of solid solutions, Hume Rothery's rules, intermediate alloy phases, and electron compounds

**Equilibrium Diagrams:** Experimental methods of construction of equilibrium diagrams, Isomorphous alloy systems, equilibrium cooling and heating of alloys, Lever rule, coring miscibility gaps, eutectic systems, congruent melting intermediate phases, peritectic reaction. Transformations in the solid state – allotropy, eutectoid, peritectoid reactions, phase rule, relationship between equilibrium diagrams and properties of alloys. Study of binary phase diagrams such as Cu-Ni and Fe-Fe<sub>3</sub>C.

**UNIT–II**

**Ferrous metals and alloys:** Structure and properties of White Cast iron, Malleable Cast iron, grey cast iron, Spheroidal graphite cast iron, Alloy cast iron. Classification of steels, structure and properties of plain carbon steels, Low alloy steels, Hadfield manganese steels, tool and die steels.

**Non-ferrous Metals and Alloys:** Structure and properties of Copper and its alloys, Aluminium and its alloys, Titanium and its alloys, Magnesium and its alloys, Super alloys.

**UNIT–III**

**Heat treatment of Steels:** Effect of alloying elements on Fe-Fe<sub>3</sub>C system, annealing, normalizing, hardening, TTT diagrams, tempering, hardenability, surface - hardening methods, age hardening treatment, Cryogenic treatment.

**UNIT–IV**

**Powder Metallurgy:** Basic processes- Methods of producing metal powders- milling atomization- Granulation-Reduction-Electrolytic Deposition. Compacting methods – Sintering - Methods of manufacturing sintered parts. Secondary operations, Applications of powder metallurgical products.

**D.N.R. COLLEGE OF ENGINEERING & TECHNOLOGY(Autonomous)  
BALUSUMUDI, BHIMAVARAM, W.G. Dist., A.P., PIN-534 202**

**DEPARTMENT OF MECHANICAL ENGINEERING**

**UNIT– V**

**Ceramic and Advanced materials:** Crystalline ceramics, glasses, cermets, abrasive materials, Classification of composites, manufacturing methods, particle reinforced composites, fiber reinforced composites, PMC, MMC, CMC and CCCs. Introduction to Nano materials and smart materials.

**Text Books:**

1. S.H.Avner, Introduction to Physical Metallurgy, 2/e, Tata McGraw- Hill, 1997.

**MECHANICS OF SOLIDS & MATERIALS SCIENCE LAB (BT24ME2104)**

**Course Objective:**

- Evaluate the values of yield stress, ultimate stress and bending stress of the given specimen under tension test and bending test
- Conduct the torsion test to determine the modulus of rigidity of given specimen.
- Justify the Rockwell hardness test over with Brinell hardness and measure the hardness of the given specimen.
- Examine the stiffness of the open coil and closed coil spring and grade them.
- Analyze the microstructure and characteristics of ferrous and non ferrous alloy specimens.

**NOTE: Any 6 experiments from each section A and B.**

**A) MECHANICS OF SOLIDS LAB:**

1. Tensile test
2. Bending test on
  - a) Simply supported beam
  - b) Cantilever beam
3. Torsion test
4. Hardness test
  - a) Brinell's hardness test
  - b) Rockwell hardness test
  - c) Vickers hardness test
5. Test on springs
6. Impact test
  - a) Charpy test
  - b) Izod test
7. Punch shear test
8. Liquid penetration test

**B) MATERIAL SCIENCE LAB:**

1. Preparation and study of the Microstructure of pure metals.
2. Preparation and study of the Microstructure of Mild steel, medium carbon steels, and High carbon steels.
3. Study of the Microstructures of Cast Irons.
4. Study of the Microstructures of Non-Ferrous alloys.
5. Study of the Microstructures of Heat treated steels.
6. Hardenability of steels by Jominy End Quench Test.

**D.N.R. COLLEGE OF ENGINEERING & TECHNOLOGY(Autonomous)  
BALUSUMUDI, BHIMAVARAM, W.G. Dist., A.P., PIN-534 202**

**DEPARTMENT OF MECHANICAL ENGINEERING**

**Virtual lab:**

1. To investigate the principal stresses  $\sigma_a$  and  $\sigma_b$  at any given point of a structural element or machine component when it is in a state of plane stress. (<https://virtual-labs.github.io/exp-rockwell-hardness-experiment-iiith/objective.html>)
2. To find the impact resistance of mild steel and cast iron. (<https://sm-nitk.vlabs.ac.in/exp/izod-impact-test>).
3. To find the impact resistance of mild steel. (<https://sm-nitk.vlabs.ac.in/exp/charpy-impact-test/index.html>)
4. To find the Rockwell hardness number of mild steel, cast iron, brass, aluminum and spring steel etc. (<https://sm-nitk.vlabs.ac.in/exp/rockwell-hardness-test>)
5. To determine the indentation hardness of mild steel, brass, aluminum etc. using Vickers hardness testing machine. (<https://sm-nitk.vlabs.ac.in/exp/vickers-hardness-test>).

**Course Outcomes:**

| COs | Statements  | Blooms Level |
|-----|---|--------------|
| CO1 | Understand the stress strain behavior of different materials.             | L2           |
| CO2 | Evaluate the hardness of different materials.                             | L4           |
| CO3 | Explain the relation between elastic constants and hardness of materials. | L1           |
| CO4 | Identify various microstructures of steels and cast irons.                | L3           |
| CO5 | Evaluate hardness of treated and untreated steels.                        | L4           |

**COMPUTER-AIDED MACHINE DRAWING  
(BT24ME2105)**

**Course Objectives**

- Introduce conventional representations of material and machine components.
- Train to use software for 2D and 3D modeling.
- Familiarize with thread profiles, riveted, welded and key joints.
- Teach solid modeling of machine parts and their sections.
- Explain creation of 2D and 3D assembly drawings and Familiarize with limits, fits, and tolerances in mating components

**The following are to be done by any 2D software package**

**Conventional representation of materials and components:**

**Detachable joints:** Drawing of thread profiles, hexagonal and square-headed bolts and nuts, bolted joint with washer and locknut, stud joint, screw joint and foundation bolts.

**Riveted joints:** Drawing of rivet, lap joint, butt joint with single strap, single riveted, double riveted double strap joints.

**Welded joints:** Lap joint and T joint with fillet, butt joint with conventions.

**Keys:** Taper key, sunk taper key, round key, saddle key, feather key, woodruff key.

**Couplings:** rigid – Muff, flange; flexible – bushed pin-type flange coupling, universal coupling, Oldham's' coupling.

**The following exercises are to be done by any 3D software package:**

**Sectional views:**

Creating solid models of complex machine parts and sectional views.

**Assembly drawings:(Any four of the following using solid model software)**

Lathe tool post, tool head of shaping machine, tail-stock, machine vice, gate valve, carburetor, piston, connecting rod, eccentric, screw jack, plumber block, axle bearing, pipe vice, clamping device, Geneva cam, universal coupling.

**Production drawing:**

Representation of limits, fits and tolerances for mating parts. Use any four parts of above assembly drawings and prepare manufacturing drawing with dimensional and geometric tolerances.

**Textbooks:**

- 1 Machine Drawing by K.L.Narayana, P.Kannaiah and K.Venkat Reddy, New Age International Publishers, 3/e, 2014
- 2 Machine drawing by N.Sideswar, P. Kannaiah, V.V.S.Sastry, TMH Publishers. 2014.

**PYTHON PROGRAMMING LAB (BT24CS2107)**

**Course Objectives:**

1. **Fundamental Understanding:** Develop a solid foundation in Python programming, covering essential syntax, semantics, and constructs.
2. **Data Manipulation:** Equip students with skills to handle and manipulate data using Python libraries like Pandas and NumPy.
3. **Problem-Solving:** Enhance problem-solving abilities by implementing various algorithms and data structures in Python.
4. **Software Development:** Foster software development skills, including version control, package management, and project documentation.
5. **Advanced Techniques:** Introduce advanced Python topics such as web scraping, API interaction, and database management.

**Experiment 1: Introduction to Python**

- Objective: Install Python and set up the development environment.
- Tasks:
  - Install Python and an IDE (e.g., PyCharm, VSCode, or Jupyter Notebook).
  - Write and run a simple "Hello, World!" program.
  - Understand and demonstrate basic Python syntax and semantics.

**Experiment 2: Basic Python Programming**

- Objective: Learn basic programming constructs in Python.
- Tasks:
  - Create programs using variables, data types, and operators.
  - Implement basic input and output functions.
  - Write programs using control structures (if statements, for loops, while loops).

**Experiment 3: Functions and Modules**

- Objective: Understand functions and module usage in Python.
- Tasks:
  - Define and call functions with different types of arguments and return values.
  - Explore and use built-in Python modules.
  - Write a script that imports and utilizes at least two different standard library modules.

**Experiment 4: Lists and Tuples**

- Objective: Work with Python lists and tuples.
- Tasks:
  - Create, modify, and iterate over lists and tuples.
  - Perform list comprehensions to create new lists.
  - Demonstrate the immutability of tuples.

**Experiment 5: Dictionaries and Sets**

- Objective: Explore dictionaries and sets in Python.
- Tasks:
  - Create and manipulate dictionaries.
  - Use dictionary comprehension.

**DEPARTMENT OF MECHANICAL ENGINEERING**

- Create and perform operations on sets.

**Experiment 6: Strings and File I/O**

- Objective: Manipulate strings and perform file I/O operations.
- Tasks:
  - Demonstrate various string methods.
  - Write programs to read from and write to text files.
  - Work with different file formats, including CSV and JSON.

**Experiment 7: Error Handling and Exceptions**

- Objective: Implement error handling in Python programs.
- Tasks:
  - Write programs using try, except, else, and finally blocks.
  - Handle specific exceptions.
  - Create and raise custom exceptions.

**Experiment 8: Object-Oriented Programming (OOP)**

- Objective: Understand and implement OOP concepts in Python.
- Tasks:
  - Define classes and create objects.
  - Demonstrate inheritance and polymorphism.
  - Use class and instance variables in programs.

**Experiment 9: Libraries and Packages**

- Objective: Utilize third-party libraries and create Python packages.
- Tasks:
  - Install and use libraries like NumPy and Pandas.
  - Create a simple Python package and distribute it.
  - Work with virtual environments to manage dependencies.

**Experiment 10: Working with Data**

- Objective: Perform data manipulation and visualization.
- Tasks:
  - Use Pandas to load, manipulate, and analyze datasets.
  - Create visualizations using Matplotlib and Seaborn.
  - Conduct basic data analysis tasks and summarize findings.

**Experiment 11: Web Scraping and APIs**

- Objective: Extract data from the web and interact with APIs.
- Tasks:
  - Access and parse data from RESTful APIs.
  - Process and analyze JSON data from APIs.

**Experiment 12: Databases**

- **Objective:** Work with databases in Python.
- **Tasks:**
  - Connect to a database using SQLite and SQLAlchemy.
  - Perform CRUD operations on the database.
  - Write queries to manage and retrieve data.

**D.N.R. COLLEGE OF ENGINEERING & TECHNOLOGY(Autonomous)

**EMBEDDED SYSTEMS & IoT (BT24EC2106)**

**Course Objectives:**

- To comprehend Microcontroller-Transducers Interface techniques
- To establish Serial Communication link with Arduino
- To analyse basics of SPI interface.
- To interface Stepper Motor with Arduino
- To analyse Accelerometer interface techniques
- To introduce the Raspberry PI platform, that is widely used in IoT applications
- To introduce the implementation of distance sensor on IoT devices.

**Embedded Systems Experiments: (Any 5 experiments from the following)**

1. Measure Analog signal from Temperature Sensor.
  2. Generate PWM output.
  3. Drive single character generation on Hyper Terminal.
  4. Drive a given string on Hyper Terminal.
  5. Full duplex Link establishment using Hyper terminal.
  6. Drive a given value on a 8 bit DAC consisting of SPI.
  7. Drive Stepper motor using Analog GPIOs.
  8. Drive Accelerometer and Display the readings on Hyper Terminal.
- COMPONENTS/ BOARDS: 1. Arduino Duemilanove Board 2. Arduino Software IDE.

**Text Books:**

1. Embedded Systems Architecture- By Tammy Noergaard, Elsevier Publications, 2013.
2. Embedded Systems-By Shibu. K.V-Tata McGraw Hill Education Private Limited, 2013.
3. Embedded System Design, Frank Vahid, Tony Givargis, John Wiley Publications, 2013.
4. Embedded Systems-Lyla B.Das-Pearson Publications,2013.

**Internet of Things Experiments: (Any 5 experiments from the following)**

1. Getting started with Raspberry Pi, Install Raspian on your SD card.
2. Python-based IDE (integrated development environments) for the Raspberry Pi and how to trace and debug Python code on the device.
3. Using Raspberry pi a. Calculate the distance using distance sensor. b. Basic LED functionality.
4. Raspberry Pi interact with online services through the use of public APIs and SDKs.
5. Study and Install IDE of Arduino and different types of Arduino.
6. Study and Implement Zigbee Protocol using Arduino / Raspberry Pi.
7. Calculate the distance using distance sensor Using Arduino.

**D.N.R. COLLEGE OF ENGINEERING & TECHNOLOGY(Autonomous)  
BALUSUMUDI, BHIMAVARAM, W.G. Dist., A.P., PIN-534 202**

**DEPARTMENT OF MECHANICAL ENGINEERING**

8. Basic LED functionality Using Arduino.
9. Calculate temperature using temperature sensor Using Arduino.
10. Calculate the distance using distance sensor Using Node MCU.
11. Basic LED functionality Using Node MCU.

**Text Books:**

**D.N.R. COLLEGE OF ENGINEERING & TECHNOLOGY(Autonomous)  
BALUSUMUDI, BHIMAVARAM, W.G. Dist., A.P., PIN-534 202**

**DEPARTMENT OF MECHANICAL ENGINEERING**

**Course Outcomes:**

| <b>COs</b> | <b>Statements</b>   | <b>Blooms Level</b> |
|------------|---|---------------------|
| CO1        | Comprehend Microcontroller-Transducers Interface techniques.  | L4                  |
| CO2        | Establish Serial Communication link with Arduino  | L6                  |
| CO3        | Analyse basics of SPI interface.  | L4                  |
| CO4        | Understand the concept of M2M (machine to machine) with necessary protocols and get awareness in implementation of distance sensor. | L2                  |
| CO5        | Realize the revolution of internet in mobile devices, cloud and sensor networks   | L3                  |

**D.N.R. COLLEGE OF ENGINEERING & TECHNOLOGY(Autonomous)  
BALUSUMUDI, BHIMAVARAM, W.G. Dist., A.P., PIN-534 202**

**II Year I Semester**

| L | T | P | C  |
|---|---|---|----|
| 2 | 0 | 0 | -- |

**ENVIRONMENTAL SCIENCE (BT24MBS2106)**

**Course Objectives:**

- To make the students to get awareness on environment
- To understand the importance of protecting natural resources, ecosystems for future generations and pollution causes due to the day-to-day activities of human life
- To save earth from the inventions by the engineers.

**UNIT – I**

Multidisciplinary Nature of Environmental Studies: – Definition, Scope and Importance – Need for Public Awareness.

Natural Resources : Renewable and non-renewable resources – Natural resources and associated problems – Forest resources – Use and over – exploitation, deforestation, case studies – Timber extraction – Mining, dams and other effects on forest and tribal people – Water resources – Use and over utilization of surface and ground water – Floods, drought, conflicts over water, dams – benefits and problems – Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources, case studies – Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems, water logging, salinity, case studies. – Energy resources:

**UNIT – II**

Ecosystems: Concept of an ecosystem. – Structure and function of an ecosystem – Producers, consumers and decomposers – Energy flow in the ecosystem – Ecological succession – Food chains, food webs and ecological pyramids – Introduction, types, characteristic features, structure and function of the following ecosystem:

- a. Forest ecosystem.
- b. Grassland ecosystem
- c. Desert ecosystem
- d. Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)

Biodiversity and Its Conservation : Introduction and Definition: genetic, species and ecosystem diversity – Bio-geographical classification of India – Value of biodiversity: consumptive use, Productive use, social, ethical, aesthetic and option values – Biodiversity at global, National and local levels – India as a mega-diversity nation – Hot-spots of biodiversity – Threats to biodiversity: habitat loss, poaching of wildlife, man-wildlife conflicts – Endangered and endemic species of India – Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.

**UNIT – III**

Environmental Pollution: Definition, Cause, effects and control measures of:

**D.N.R. COLLEGE OF ENGINEERING & TECHNOLOGY(Autonomous)  
BALUSUMUDI, BHIMAVARAM, W.G. Dist., A.P., PIN-534 202**

**DEPARTMENT OF MECHANICAL ENGINEERING**

- a. Air Pollution.
- b. Water pollution
- c. Soil pollution
- d. Marine pollution
- e. Noise pollution
- f. Thermal pollution
- g. Nuclear hazards

Solid Waste Management: Causes, effects and control measures of urban and industrial wastes – Role of an individual in prevention of pollution – Pollution case studies – Disaster management: floods, earthquake, cyclone and landslides.

**UNIT – IV**

Social Issues and the Environment: From Unsustainable to Sustainable development – Urban problems related to energy – Water conservation, rain water harvesting, watershed management – Resettlement and rehabilitation of people; its problems and concerns. Case studies – Environmental ethics: Issues and possible solutions – Climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust. Case Studies – Wasteland reclamation. – Consumerism and waste products. – Environment Protection Act. – Air (Prevention and Control of Pollution) Act. – Water (Prevention and control of Pollution) Act – Wildlife Protection Act – Forest Conservation Act – Issues involved in enforcement of environmental legislation – Public awareness.

**UNIT – V**

Human Population And The Environment: Population growth, variation among nations. Population explosion – Family Welfare Programmes. – Environment and human health – Human Rights – Value Education – HIV/AIDS – Women and Child Welfare – Role of information Technology in Environment and human health – Case studies.

Field Work: Visit to a local area to document environmental assets River/forest grassland/hill/mountain – Visit to a local polluted site-Urban/Rural/Industrial/Agricultural Study of common plants, insects, and birds – river, hill slopes, etc.

**INDUSTRIAL MANAGEMENT(BT24ME2201)**

**Course Objectives:** The objectives of the course are to

- Introduce the scope and role of industrial engineering and the techniques for optimal design of layouts
- Illustrate how work study is used to improve productivity
- Explain TQM and quality control techniques
- Introduce financial management aspects and
- Discuss human resource management and value analysis.

**UNIT- I**

**INTRODUCTION:** Definition of industrial engineering (I.E), development, applications, role of an industrial engineer, differences between production management and industrial engineering, quantitative tools of IE and productivity measurement. concepts of management, importance, functions of management, scientific management, Taylor's principles, theory X and theory Y, Fayol's principles of management.

**PLANT LAYOUT:** Factors governing plant location, types of production layouts, advantages and disadvantages of process layout and product layout, applications, quantitative techniques for optimal design of layouts, plant maintenance, preventive and break down maintenance.

**UNIT-II**

**WORK STUDY:** Importance, types of production, applications, work study, method study and time study, work sampling, PMTS, micro-motion study, rating techniques, MTM, work factor system, principles of Ergonomics, flow process charts, string diagrams and Therbligs.

**UNIT-III**

**STATISTICAL QUALITY CONTROL:** Quality control, Queuing assurance and its importance, SQC, attribute sampling inspection with single and double sampling, Control charts -  $\bar{X}$  and R -charts  $\bar{X}$  and S charts and their applications, numerical examples.

**TOTALQUALITYMANAGEMENT:** zero defect concept, quality circles, implementation, applications, ISO quality systems. Six Sigma-definition, basic concepts

**UNIT- IV**

**FINANCIAL MANAGEMENT:** Scope and nature of financial management, Sources of finance, Ratio analysis, Management of working capital, estimation of working capital requirements, stock management, Cost accounting and control, budget and budgetary control, Capital budgeting - Nature of Investment Decisions - Investment Evaluation criteria- NPV, IRR, PI, Payback Period, and ARR, numerical problems.

**D.N.R. COLLEGE OF ENGINEERING & TECHNOLOGY(Autonomous)  
BALUSUMUDI, BHIMAVARAM, W.G. Dist., A.P., PIN-534 202**

**DEPARTMENT OF MECHANICAL ENGINEERING**

**UNIT-V**

**HUMAN RESOURCE MANAGEMENT:** Concept of human resource management, personnel management and industrial relations, functions of personnel management, Job-evaluation, its importance and types, merit rating, quantitative methods, wage incentive plans, and types.

**VALUE ANALYSIS:** Value engineering, implementation procedure, enterprise resource planning and supply chain management.

**Text Books:**

**COMPLEX VARIABLES, PROBABILITY AND STATISTICS (BT24BS2201)**

**Course Objectives:**

- To familiarize the complex variables.
- To familiarize the students with the foundations of probability and statistical methods.
- To equip the students to solve application problems in their disciplines.

**UNIT– I: Functions of a complex variable and Complex integration:**

Introduction–Continuity –Differentiability–Analyticity –Cauchy-Riemann equations in Cartesian and polar coordinates–Harmonic and conjugate harmonic functions– Milne-Thompson method.

Complex integration: Line integral –Cauchy’s integral theorem –Cauchy’s integral formula–Generalized integral formula (all without proofs) and problems on above theorems.

**UNIT – II: Series expansions and Residue Theorem:**

Radius of convergence – Expansion in Taylor’s series, Maclaurin’s series and Laurent series.

Types of Singularities: Isolated – Essential –Pole of order m– Residues – Residue theorem (without proof) – Evaluation of real integral of the type  $\int_C^{c+2\pi} f(x)dx$

and  $\int_C f(\cos\theta, \sin\theta)d\theta$  .

**UNIT–III: Probability and Distributions:**

Review of probability and Baye’s theorem – Random variables – Discrete and Continuous random variables – Distribution functions – Probability mass function, Probability density function and Cumulative distribution functions – Mathematical Expectation and Variance – Binomial, Poisson, Uniform and Normal distributions.

**UNIT–IV: Sampling Theory:**

Introduction – Population and Samples – Sampling distribution of Means and Variance (definition only)–Central limit theorem (without proof)–Representation of the normal theory distributions– Introduction to t,  $\chi^2$  and F-distributions- point and interval estimations – maximum error of estimate.

**UNIT–V: Tests of Hypothesis:**

Introduction – Hypothesis – Null and Alternative Hypothesis – Type I and Type II errors – Level of significance – One tail and two-tail tests – Tests concerning one mean and two means (Large and Small samples)–Tests on proportions.

**MANUFACTURING PROCESSES(BT24ME2202)**

**Course Objective:** The objectives of the course are to

- Know the working principle of different metal casting processes and gating system.
- Classify the welding processes, working of different types of welding processes and welding defects.
- Know the nature of plastic deformation, cold and hot working process, working of a rolling mill and types, extrusion processes.
- Understand the principles of forging, tools and dies, working of forging processes.
- Know about the Additive manufacturing.

**UNIT- I**

**Casting:** Steps involved in making a casting – Advantage of casting and its applications. Patterns and Pattern making – Types of patterns – Materials used for patterns, pattern allowances and their construction, Molding, different types of cores , Principles of Gating, Risers, casting design considerations. Methods of melting and types of furnaces, Solidification of castings and casting defects- causes and remedies. Basic principles and applications of special casting processes - Centrifugal casting, Die casting, Investment casting and shell molding.

**UNIT-II**

**Welding:** Classification of welding processes, types of welded joints and their characteristics, Gas welding, Different types of flames and uses, Oxy – Acetylene Gas cutting. Basic principles of Arc welding, power characteristics, Manual metal arc welding, submerged arc welding, TIG & MIG welding. Electro-slag welding.

Resistance welding, Friction welding, Friction stir welding, Forge welding, Explosive welding; Thermit welding, Plasma Arc welding, Laser welding, electron beam welding, Soldering & Brazing.

Heat affected zones in welding; pre & post heating, welding defects –causes and remedies.

**UNIT-III**

**Bulk Forming:** Plastic deformation in metals and alloys-recovery, recrystallization and grain growth. Hot working and Cold working-Strain hardening and Annealing. Bulk forming processes: Forging-Types of Forging, forging defects and remedies; Rolling – fundamentals, types of rolling mills and products, Forces in rolling and power requirements. Extrusion and its characteristics. Types of extrusion, Impact extrusion, Hydrostatic extrusion; Wire drawing and Tube drawing.

**D.N.R. COLLEGE OF ENGINEERING & TECHNOLOGY(Autonomous)  
BALUSUMUDI, BHIMAVARAM, W.G. Dist., A.P., PIN-534 202**

**DEPARTMENT OF MECHANICAL ENGINEERING**

**UNIT- IV**

**Sheet metal forming**-Blanking and piercing, Forces and power requirement in these operations, Deep drawing, Stretch forming, Bending, Spring back and its remedies, Coining, Spinning, Types of presses and press tools.

High energy rate forming processes: Principles of explosive forming, electromagnetic forming, Electro hydraulic forming, rubber pad forming, advantages and limitations.

**UNIT -V**

**Additive manufacturing** - Steps in Additive Manufacturing (AM), Classification of AM processes, Advantages of AM, and types of materials for AM, VAT photo polymerization AM Processes, Extrusion - Based AM Processes, Powder Bed Fusion AM Processes, Direct Energy Deposition AM Processes, Post Processing of AM Parts, Applications

**Text books:**

**FLUID MECHANICS & HYDRAULIC MACHINES (BT24ME2203)**

**Course Objectives:** The students completing this course are expected to

- Understand the properties of fluids, manometry, hydrostatic forces acting on different surfaces
- Understand the kinematic and dynamic behavior through various laws of fluids like continuity, Euler's, Bernoulli's equations, energy and momentum equations.
- Understand the theory of boundary layer, working and performance characteristics of various hydraulic machines like pumps and turbines.

**UNIT I**

**Fluid statics:** Dimensions and units: physical properties of fluids - specific gravity, viscosity and its significance, surface tension, capillarity, vapor pressure. Atmospheric, gauge and vacuum pressure, Measurement of pressure – Manometers - Piezometer, U-tube, inverted and differential manometers. Pascal's & hydrostatic laws.

**Buoyancy and floatation:** Meta center, stability of floating body. Submerged bodies. Calculation of metacenter height. Stability analysis and applications.

**UNIT II**

**Fluid Kinematics:** Introduction, flow types. Equation of continuity for one dimensional flow, circulation and vorticity, Stream line, path line and streak lines and stream tube. Stream function and velocity potential function, differences and relation between them. Condition for irrotational flow, flownet, source and sink, double tank and vortex flow.

**Fluid dynamics:** surface and body forces – Euler's and Bernoulli's equations for flow along a streamline, momentum equation and its applications, force on pipe bend.

**Closed conduit flow:** Reynold's experiment- Darcy Weisbach equation- Minor losses in pipes- pipes in series and pipes in parallel total energy line hydraulic gradient line.

**UNIT III**

**Boundary Layer Theory:** Introduction, momentum integral equation, displacement, momentum and energy thickness, separation of boundary layer, control of flow separation, Stream lined body, Bluff body and its applications, basic concepts of velocity profiles.

**Dimensional Analysis:** Dimensions and Units, Dimensional Homogeneity, Non dimensionalization of equations, Method of repeating variables and Buckingham Pi Theorem.

**UNIT IV**

**Basics of turbo machinery:** hydrodynamic force of jets on stationary and moving flat, inclined, and curved vanes, jet striking centrally and at tip, velocity diagrams, work done and efficiency, flow over radial vanes.

**Hydraulic Turbines:** classification of turbines, impulse and reaction turbines, Pelton

**D.N.R. COLLEGE OF ENGINEERING & TECHNOLOGY(Autonomous)  
BALUSUMUDI, BHIMAVARAM, W.G. Dist., A.P., PIN-534 202**

**DEPARTMENT OF MECHANICAL ENGINEERING**

wheel, Francis turbine and Kaplan turbine-working proportions, work done, efficiencies, hydraulic design –draft tube-theory-functions and efficiency.

**UNITV**

**Performance of hydraulic turbines:** Geometric similarity, Unit and specific quantities, characteristic curves, governing of turbines, selection of type of turbine, cavitation, surge tank, water hammer. Hydraulic systems- hydraulic ram, hydraulic lift, hydraulic coupling. Fluidics – amplifiers, sensors and oscillators. Advantages, limitations and applications.

**Centrifugal pumps:** classification, working, work done – manometric head- losses and efficiencies-specific speed- pumps in series and parallel-performance characteristic curves, cavitation & NPSH. **Reciprocating pumps:** Working, Discharge, slip, indicator diagrams.

**D.N.R. COLLEGE OF ENGINEERING & TECHNOLOGY(Autonomous)  
BALUSUMUDI, BHIMAVARAM, W.G. Dist., A.P., PIN-534 202**

**DEPARTMENT OF MECHANICAL ENGINEERING**

**Course Outcomes:**

| <b>COs</b> | <b>Statements</b>  | <b>Blooms Level</b> |
|------------|--|---------------------|
| C01        | Understand the basic concepts of fluid properties.   | L2                  |
| C02        | Estimate the mechanics of fluids in static and dynamic conditions.                           | L5                  |
| C03        | Apply the Boundary layer theory, flow separation and dimensional analysis.                   | L3                  |
| C04        | Estimate the hydro dynamic forces of jet on vanes indifferent positions.                     | L5                  |
| C05        | Understand the working Principles and performance evaluation of hydraulic pump and turbines. | L2                  |

**II Year II Semester**

**THEORY OF MACHINES (BT24ME2204)**

**Course Objectives:** The objectives of the course are to make the students learn about

- Introduce various basic mechanisms and their applications.
- Explain importance of degree of freedom.
- Familiarize velocity and acceleration in mechanisms.
- Describe the cams and follower motions.
- Explain the importance of gyroscopic couples.
- Introduce the equation of motion for single degree of freedom system.

**UNIT – I: Simple Mechanisms**

**10 Hrs**

**Simple Mechanisms:** Classification of mechanisms – Basic kinematic concepts and definitions – Degree of freedom, mobility – Grashof's law, kinematic inversions of four bar chain and slider crank chains- Limit positions – Mechanical advantage- Transmission angle- Description of some common mechanisms- Quick return mechanism, straight line mechanisms – Universal Joint – Rocker mechanisms.

**UNIT – II: Plane and motion analysis**

**12 Hrs**

**Plane and motion analysis:** Displacement, velocity and acceleration analysis of simple mechanisms, graphical velocity analysis using instantaneous centers, velocity and acceleration analysis using loop closure equations – kinematic analysis of simple mechanisms – slider crank mechanism dynamics – Coincident points – Coriolis component of acceleration.

**UNIT – III: Gyroscope & Gear Profile**

**10Hrs**

**Gyroscope:** Principle of gyroscope, gyroscopic effect in an aeroplane, ship, car and two wheeler, simple problems

**Gear Profile:** Involute and cycloidal gear profiles, gear parameters, fundamental law of gearing and conjugate action, spur gear contact ratio and interference/undercutting – helical, bevel, worm, rack & pinion gears, epicyclic and regular gear train kinematics.

**UNIT – IV: Balancing of Rotating masses & Cams**

**12 Hrs**

**Balancing of Rotating masses:** Need for balancing, balancing of single mass and several masses in different planes, using analytical and graphical methods.

**Cams:** Classification of cams and followers- Terminology and definitions – Displacement diagrams – Uniform velocity, parabolic, simple harmonic and cycloidal motions – derivatives of follower motions- specified contour cams- circular and tangent cams – pressure angle and undercutting.

**D.N.R. COLLEGE OF ENGINEERING & TECHNOLOGY(Autonomous)  
BALUSUMUDI, BHIMAVARAM, W.G. Dist., A.P., PIN-534 202**

**DEPARTMENT OF MECHANICAL ENGINEERING**

**UNIT – V: Vibrations & Turning Moment Diagrams and Flywheels**

**10Hrs**

**Vibrations:** Introduction, degree of freedom, types of vibrations, free natural vibrations, Newton method and energy method for single degree of freedom. Damped vibrations- under damped, critically damped; and over damped systems, forced vibrations with and without damping in single degree of freedom; Vibration isolation and transmissibility.

**Turning Moment Diagrams and Flywheels:** Turning moment diagrams for steam engine, I.C engine and Multi Cylinder Engine. Crank effort – coefficient of fluctuation of energy, coefficient of fluctuation of speed – Fly Wheel and their design, fly wheels for punching press.

**Text Books:**

1. S.S.Rattan, Theory of Machines, 4/e, Tata Mc-Graw Hill, 2014.
2. P.L.Ballaney, Theory of Machines & Mechanisms, 25/e, Khanna Publishers, Delhi, 2003.

**Reference Books:**

5. William T. Thomson, Theory of vibration with applications, 4/e, Englewood Cliffs, N.J.: Prentice Hall, 1993.

**Course Outcomes:**

| COs | Statements  | Blooms Level |
|-----|---|--------------|
| CO1 | Understand different mechanisms and their inversions.                           | L2           |
| CO2 | Calculate velocity and acceleration of different links in a mechanism           | L4           |
| CO3 | Apply the effects of gyroscopic couple in ships, aero planes and road vehicles. | L3           |
| CO4 | Evaluate unbalance mass in rotating machines.                                   | L5           |
| CO5 | Analyze free and forced vibrations of single degree freedom systems.            | L4           |

**FLUID MECHANICS & HYDRAULIC MACHINES LAB**

**(BT24ME2205)**

**Course Objective:** To impart practical exposure on the performance evaluation methods of various flow measuring equipment and hydraulic turbines and pumps.

**List of Experiments**

1. Impact of jets on Vanes.
2. Performance Test on Pelton Wheel.
3. Performance Test on Francis Turbine.
4. Performance Test on Kaplan Turbine.
5. Performance Test on Single Stage Centrifugal Pump.
6. Performance Test on Multi Stage Centrifugal Pump.
7. Performance Test on Reciprocating Pump.
8. Calibration of Venturimeter.
9. Calibration of Orificemeter.
10. Determination of friction factor for a given pipeline.
11. Determination of loss of head due to sudden contraction in a pipeline.
12. Turbine flow meter.

**Virtual Lab:**

1. To study different patterns of a flow through a pipe and correlate them with the Reynolds number of the flow. (<https://me.iitp.ac.in/Virtual-Fluid-Laboratory/reynolds/introduction.html>)
2. To calculate Total Energy at different points of venture meter. (<https://me.iitp.ac.in/Virtual-Fluid-Laboratory/bernoulli/introduction.html>).
3. To calculate the flow (or point) velocity at center of the given tube using different flow rates. (<https://me.iitp.ac.in/Virtual-Fluid-Laboratory/pitot/introduction.html>)
4. To determine the hydrostatic force on a plane surface under partial submerge and full submerge condition. (<https://me.iitp.ac.in/Virtual-Fluid-Laboratory/cop/introduction.html>).
5. To determine the discharge coefficient of a triangular notch. (<https://me.iitp.ac.in/Virtual-Fluid-Laboratory/notch/introduction.html>)
6. To determine the coefficient of impact of jet on vanes. (<https://fm-nitk.vlabs.ac.in/exp/impact-of-jet>).
7. To determine friction in pipes. (<https://fm-nitk.vlabs.ac.in/exp/friction-in-pipes/index.html>).

**MANUFACTURING PROCESSES LAB**

**(BT24ME2206)**

**Course Objective:** Acquire practical knowledge on Metal Casting, Welding, Press Working and Processing of Plastics.

**List of Experiments**

1. Design and making of pattern
  - i. Single piece pattern
  - ii. Split pattern
2. Sand properties testing
  - i. Sieve analysis(dry sand)
  - ii. Clay content test
  - iii. Moisture content test
  - iv. Strength test(Compression test & Shear test)
  - v. Permeability test
3. Mould preparation
  - i. Straight pipe
  - ii. Bent pipe
  - iii. Dumble
  - iv. Gear blank
4. Gas cutting and welding
5. Manual metal arc welding
  - i. Lap joint
  - ii. Butt joint
6. Injection Molding
7. Blow Molding
8. Simple models using sheet metal operations
9. Study of deep drawing and extrusion operations
10. To make weldments using TIG/MIG welding
11. To weld using Spot welding machine
12. To join using Brazing and Soldering
13. To make simple parts on a 3D printing machine
14. Demonstration of metal casting.

**Virtual Lab:**

1. To study and observe various stages of casting through demonstration of casting process. (<https://virtual-labs.github.io/exp-sand-casting-process-dei/theory.html>)
2. To weld and cut metals using an oxyacetylene welding setup. (<https://virtual-labs.github.io/exp-gas-cutting-processes-iitkgp/index.html>).
3. To simulate Fused deposition modelling process (FDM) (<https://3dpdei.vlabs.ac.in/exp/simulation-modelling-process>)

**SOFT SKILLS  
(BT24BS2205)**

**Course Objectives:**

- To prepare to face global competition for employment and excellence in profession.
- To help the students understand and build interpersonal and interpersonal skills that will enable them to lead meaningful professional life.

**UNIT – 1: INTRODUCTION**

Introduction- Emergence of life skills, Definition & Meaning, Importance& need, reasons for skill gap, Analysis--Soft Skills vs Hard skills, Linkage between industry and soft skills, Challenges, Personality Developments. Soft Skills, Soft Skills vs English - Improving Techniques.

**UNIT – II: Intra-Personal:**

Definition-Meaning – Importance-SWOT analysis, Johari windows - Goal Setting- quotient skills - Emotional Intelligence- Attitudinal skills - Right thinking- Problem Solving-Time management, stress management.

**UNIT – III: Inter-Personal:**

Definition – Meaning – Importance-Communications skills- Team Work, managerial skills -Negotiation skills- Leadership skills, corporate etiquettes.

**UNIT – IV: Verbal Skills:**

Definition and Meaning-Listening skills, need- types, advantages, Importance-Improving Tips for Listening, Speaking, need- types, advantages, Importance- Improving Tips, Reading- Writing Skills, Report, Resume, statement of purpose, need- types, advantages, Importance-Improving Tips .

**UNIT – V: Non Verbal Skills& Interview skills**

Definition and Meaning – Importance- Facial Expressions- Eye Contact – Proxemics- Haptics -Posture, cross cultural body language, body language in interview room, appearance and dress code – Kinetics- Para Language - tone, pitch, pause, neutralization of accent, use of appropriate language, Interview skills, interview methods and questions.

**DESIGN THINKING & INNOVATION (BT24ME2207)**

**Course Objectives:** The objectives of the course are to

- Bring awareness on innovative design and new product development.
- Explain the basics of design thinking.
- Familiarize the role of reverse engineering in product development.
- Train how to identify the needs of society and convert into demand.
- Introduce product planning and product development process.

**UNIT – I Introduction to Design Thinking**

Introduction to elements and principles of Design, basics of design-dot, line, shape, form as fundamental design components. Principles of design. Introduction to design thinking, history of Design Thinking, New materials in Industry.

**UNIT - II Design Thinking Process**

Design thinking process (empathize, analyze, idea & prototype), implementing the process in driving inventions, design thinking in social innovations. Tools of design thinking - person, costumer, journey map, brainstorming, product development

**Activity:** Every student presents their idea in three minutes, Every student can present design process in the form of flow diagram or flow chart etc. Every student should explain about product development.

**UNIT - III Innovation**

Art of innovation, Difference between innovation and creativity, role of creativity and innovation in organizations. Creativity to Innovation. Teams for innovation, Measuring the impact and value of creativity.

**Activity:** Debate on innovation and creativity, Flow and planning from idea to innovation, Debate on value-based innovation.

**UNIT - IV Product Design**

Problem formation, introduction to product design, Product strategies, Product value, Product planning, product specifications. Innovation towards product design Case studies.

**Activity:** Importance of modeling, how to set specifications, Explaining their own product design.

**DEPARTMENT OF MECHANICAL ENGINEERING**

**UNIT – V Design Thinking in Business Processes**

Design Thinking applied in Business & Strategic Innovation, Design Thinking principles that redefine business – Business challenges: Growth, Predictability, Change, Maintaining Relevance, Extreme competition, Standardization. Design thinking to meet corporate needs. Design thinking for Startups. Defining and testing Business Models and Business Cases. Developing & testing prototypes.

**Activity:** How to market our own product, about maintenance, Reliability and plan for startup.

**Textbooks:**

1. Tim Brown, Change by design, 1/e, Harper Bollins, 2009.
2. Idris Mootee, Design Thinking for Strategic Innovation, 1/e, Adams Media, 2014.

Kakinada-533003, Andhra Pradesh (India)

Proc. No. JNTUK/DAP/Evaluation Procedure for DT&I/Approval/2025 Date: 27.01.2025

Sub: DAP – Academic Planning – Evaluation Procedure for Design Thinking and Innovation (L-T-P-C) (1-0-2-2) - Orders - Issued.  
Read: e-Office No. 2690537 approved by Honourable Vice Chancellor dated 27.01.2025

\*\*\*

**ORDER:**

With reference cited above, the Honorable Vice Chancellor, JNTUK is pleased to approve the recommendations for Evaluation Procedure for Design Thinking and Innovation (L-T-P-C) (1-0-2-2) as follows:

**Evaluation Procedure for Design Thinking and Innovation (L-T-P-C) (1-0-2-2):**

The performance of a student for Design Thinking and Innovation shall be evaluated with a maximum of 100 marks.

A student has to secure not less than 35% of marks in the end examination and a minimum of 40% of marks in the sum total of the mid semester and end examination marks taken together.

| Assessment Method        | Marks      |
|--------------------------|------------|
| Internal Assessment      | 30         |
| Semester End Examination | 70         |
| <b>Total</b>             | <b>100</b> |

The distribution shall be 30 marks for Internal Evaluation and 70 marks for the End-Examination.

**a) Internal Evaluation Procedure**

- Of the internal marks of 30, Day to Day Evaluation in the lab will be given a maximum of 7.5 Marks (25%) and Mid Exam(theory), a maximum of 22.5 Marks (75%).
- During the semester, there shall be two midterm examinations. Each midterm examination shall be evaluated for 30 marks of which 10 marks for objective paper (20 minutes duration), 15 marks for subjective paper (90 minutes duration) and 5 marks for assignment. 30 Marks will be scaled down to 22.5 Marks.

- a. Objective paper shall contain for 05 short answer questions with 2 marks each OR maximum of 20 bits for 10 marks.
- b. Subjective paper shall contain 3 questions of internal choice (i.e., either-or type questions of which student has to answer one from each either-or type of questions, each question carries 10 marks. The marks obtained in the subjective paper are condensed to 15 marks.
- c. 5 marks for assignment
- d. Mid examinations of Design thinking and Innovation to be conducted by the corresponding college.

**Note:**

- The subjective paper shall contain 3 either-or type questions of equal weightage of 10 marks. Any fraction shall be rounded off to the next higher mark.
  - Assignments shall be in the form of problems, mini projects, design problems, slip tests, quizzes etc., depending on the course content. It should be continuous assessment throughout the semester and the average marks shall be considered.
- iii) If the student is absent for the mid semester examination, no re-exam shall be conducted and mid semester marks for that examination shall be considered as zero.
  - iv) First midterm examination shall be conducted for I, II units of syllabus with one either or type question from each unit and third either or type question from both the units. The second midterm examination shall be conducted for III, IV and V units with one either or type question from each unit.
  - v) Final mid semester marks shall be arrived at by considering the marks secured by the student in both the mid examinations with 80% weightage given to the better mid exam and 20% to the other.
  - vi) If the student is absent for any one midterm examination, the final mid semester marks shall be arrived at by considering 80% weightage to the marks secured by the student in the appeared examination and zero to the other.
- b) End Examination (Only Practical's) Evaluation:**  
The end examination shall be evaluated for 70 marks, conducted by the concerned laboratory teacher and a senior expert in the subject from the same department.
- Procedure: 20 marks
  - Experimental work & Results: 30 marks
  - Viva voce: 20 marks.

## **Academic Regulations (DR24) for B. Tech (Regular-Full time)**

(Effective for the students admitted into I year from the Academic Year **2024-25** onwards)

DNR College of Engineering & Technology 2024 Regulations (DR24 Regulations) applicable to all programmes given hereunder. These regulations govern the B. Tech. programmes offered by all the Departments with effect from the students admitted into the programmes from academic year 2024-25.

### **1. Courses of Study**

The following programmes of study are offered at present as specializations for the B. Tech. programmes in DNR College of Engineering & Technology, Bhimavaram.

| S.No. | Programme                                    | Code | Short Name  |
|-------|--|------|-------------|
| 1     | Civil Engineering                            | 01   | CE          |
| 2     | Electrical & Electronics Engineering         | 02   | EEE         |
| 3     | Mechanical Engineering                       | 03   | ME          |
| 4     | Electronics & Communication Engineering      | 04   | ECE         |
| 5     | Computer Science & Engineering               | 05   | CSE         |
| 6     | Information Technology                       | 12   | IT          |
| 7     | Artificial Intelligence and Data Science     | 54   | B.Tech-AIDS |
| 8     | Artificial Intelligence and Machine Learning | 42   | CSE(AIML)   |

### **2. Award of the Degree**

- a. Award of the B.Tech. Degree / B.Tech. Degree with a Minor** if he/she fulfills the following:
- Pursues a Programme of study for not less than four academic years and not more than eight academic years. However, for the students availing Gap year facility this period shall be extended by two years at the most and these two years would in addition to the maximum period permitted for graduation (Eight years).
  - Registers for 160 credits and secures all 160 credits.
- b. Award of B.Tech. degree with Honors:** A student will be declared eligible for the award of the B.Tech with Honors if he/she fulfills the following:
- Student secures additional 15 credits fulfilling all the requisites of a B.Tech. program i.e., 160 credits.
  - Registering for Honors is optional.
  - Honors is to be completed simultaneously with B.Tech. programme.

## 10. Evaluation Process

The performance of a student in each semester shall be evaluated course wise with a maximum of 100 marks for theory and 100 marks for practical subject. Summer Internships shall be evaluated for 50 marks, Full Internship & Project work in final semester shall be evaluated for 200 marks, mandatory courses with no credits shall be evaluated internally for 30 marks.

A student has to secure not less than 35% of marks in the end examination and a minimum of 40% of marks in the sum total of the internal evaluation and semester end examination marks taken together for the theory, practical, design, drawing subject or project etc. In case of a mandatory course, he/she should secure 40% of the total marks.

### Theory Courses:

| Assessment Method              | Marks      |
|--------------------------------|------------|
| Continuous Internal Assessment | 30         |
| Semester End Examination       | 70         |
| <b>Total</b>                   | <b>100</b> |

- i. For theory and practical courses, the distribution shall be 30 marks for continuous Internal Evaluation and 70 marks for the Semester End-Examination.
  - ii. If any course contains two different branch subjects, the syllabus shall be written in two parts with 3 units each (Part-A and Part-B) and semester end examination question paper shall be set with two parts each for 35 marks.
  - iii. If any course is having both theory and practical components, they will be evaluated separately as theory course and practical course. However, they will be given same course code with an extension of 'T' for theory subject and 'P' for practical subject.
- a) Continuous Internal Evaluation**
- i. For theory courses, during the semester, there shall be two internal examinations. Each internal examination shall be evaluated for 30 marks of which 10 marks for objective paper (20 minutes duration), 15 marks for subjective paper (90 minutes duration) and 5 marks for assignment.
  - ii. Objective paper shall contain for 05 short answer questions with 2 marks each or maximum of 20 bits for 10 marks. Subjective paper shall contain 3 either or type questions (totally six questions from 1 to 6) of which student has to answer one from each either-or type of questions. Each question carries 5 marks.
  - iii. Note:
    - The objective paper shall be prepared in line with the quality of competitive examinations questions.
    - The subjective paper shall contain 3 either or type questions of equal weightage of 5 marks. Any fraction shall be rounded off to the next higher mark.
    - The objective paper shall be conducted on the day of subjective paper test.
    - Assignments shall be in the form of problems, mini projects, design problems, slip tests, quizzes etc., depending on the course content. It should be continuous assessment throughout the semester and the average marks shall be considered.
  - iv. If the student is absent for the internal examination, no re-exam shall be conducted and internal marks for that examination shall be considered as zero.
  - v. The first internal examination shall be conducted for I, II and half of the III unit syllabus

with one either or type question from each unit. The second internal examination shall be conducted for remaining half of the syllabus from III unit, IV and V units with one either or type question from each unit

- vi. Final internal marks shall be arrived at by considering the marks secured by the student in both the internal examinations with 80% weightage given to the better mid exam and 20% to the other.

**For Example:**

Marks obtained in first internal : 25

Marks obtained in second internal : 20

**Final internal Marks:  $(25 \times 0.8) + (20 \times 0.2) = 24$**

If the student is absent for any one internal examination, the final internal marks shall be arrived at by considering 80% weightage to the marks secured by the student in the appeared examination and zero to the other. For Example:

Marks obtained in first internal : Absent

Marks obtained in second internal: 25

**Final internal Marks:  $(25 \times 0.8) + (0 \times 0.2) = 20$**

**b) End Examination Evaluation:**

End examination of theory courses shall have the following pattern:

- Part-A shall contain 10 compulsory short answer questions for a total of 20 marks such that each question carries 2 marks.
- There shall be 2 short answer questions from each unit.
- In each of the questions in Part-B, there shall be either/or type questions of 10 marks each. Student shall answer any one of them.
- The questions from 2 to 11 in part-B shall be set by covering one unit of the syllabus for each question either/or type.

End examination of theory courses consisting of two parts of different courses, **for Example:** Basic Electrical & Electronics Engineering shall have the following pattern:

- Question paper shall be in two parts viz., Part A and Part B with equal weightage of 35 marks each.
- Part-A shall contain 10 compulsory short answer questions for a total of 10 marks such that each question carries 1 mark.
- Part-B contains Six either/or type questions of 10 marks each. Students shall answer any one of them.
- All the questions in Part-B shall be set by covering one unit of the syllabus for each question.

**Practical Courses:**

| Assessment Method              | Marks      |
|--------------------------------|------------|
| Continuous Internal Assessment | 30         |
| Semester End Examination       | 70         |
| <b>Total</b>                   | <b>100</b> |

- a) For practical courses, there shall be a continuous evaluation during the semester for 30

sessional marks and end examination shall be for 70 marks.

- b) Day-to-day work in the laboratory shall be evaluated for 15 marks by the concerned laboratory teacher based on the record/viva and 15 marks for the internal test.
- c) The end examination shall be evaluated for 70 marks, conducted by the concerned laboratory teacher and a senior expert in the subject from the same department.
- Procedure: 20 marks
  - Experimental work & Results: 30 marks
  - Viva voce: 20 marks.

In a practical course consisting of two parts (Eg: Basic Electrical & Electronics Engineering Lab), the end examination shall be conducted for 70 marks as a single laboratory in 3 hours. Internal examination shall be evaluated for 30 marks in each part and final internal marks shall be arrived by considering the average of marks obtained in two parts.

- d) For the course having design and/or drawing, such as Engineering Drawing/Graphics, the distribution of marks shall be 30 for continuous evaluation and 70 for semester end examination.

| Assessment Method              | Marks      |
|--------------------------------|------------|
| Continuous Internal Assessment | 30         |
| Semester End Examination       | 70         |
| <b>Total</b>                   | <b>100</b> |

Day-to-day work shall be evaluated for 15 marks by the concerned subject teacher based on the reports/submissions prepared in the class. And there shall be two internal examinations in a semester for duration of 2 hours each for 15 marks with weightage of 80% to better internal exam marks and 20% for the other. The subjective paper shall contain 3 either or type questions of equal weightage of 5 marks. There shall be no objective paper in internal examination. The sum of day-to-day evaluation and the internal exam marks will be the final internal marks for the course.

The end examination pattern for Engineering Drawing/Graphics, shall consists of 5 questions, either/or type, of 14 marks each. There shall be no objective type questions in the end examination. However, the end examination pattern for other courses related to design/drawing , multiple branches, etc is mentioned along with the syllabus.

- e) There shall be no external examination for mandatory courses with zero credits. However, attendance shall be considered while calculating aggregate attendance and student shall be declared to have passed the mandatory course only when he/she secures 40% or more in the internal examinations. In case, the student fails, a re-examination shall be conducted for failed candidates for 30 marks satisfying the conditions mentioned in item 1 & 2 of the regulations.
- f) The laboratory records and internal exam test papers shall be preserved for a minimum of 3 years in the respective Departments as per the College/University norms and shall be produced to the Committees of the College/University as and when the same are asked for.

**Skill oriented Courses**

**There shall be five skill-oriented courses offered during III to VII semesters.**

- i) Out of the five skill courses two shall be skill-oriented courses from the same domain of the remaining three skill courses, one shall be a soft skill course and the remaining two shall be skill-advanced courses from the same domain/Interdisciplinary/Job oriented.
- ii) The course shall carry 100 marks and shall be evaluated through continuous assessments during the semester for 30 internal marks and end examination shall be for 70 marks. Day-to-day work in the class / laboratory shall be evaluated for 30 marks by the concerned teacher based on the regularity/assignments/viva/mid semester test. The end examination similar to practical examination pattern shall be conducted by the concerned teacher and an expert in the subject nominated by the Controller of Examinations/Principal.
- iii) The Head of the Department shall identify a faculty member as coordinator for the course. A committee consisting of the Head of the Department, coordinator and a senior Faculty member nominated by the Head of the Department shall monitor the evaluation process. The marks/grades shall be assigned to the students by the above committee based on their performance.
- iv) The student shall be given an option to choose either the skill courses being offered by the college or to choose a certificate course being offered by industries/Professional bodies or any other accredited bodies. If a student chooses to take a Certificate Course offered by external agencies, the credits shall be awarded to the student upon producing the Course Completion Certificate from the agency. A committee shall be formed at the level of the Department/ College to evaluate the grades/marks given for a course by external agencies and convert to the equivalent marks/grades.
- v) The recommended courses offered by external agencies, conversions and appropriate grades/marks are to be approved by the College at the beginning of the semester.
- vi) If a student prefers to take a certificate course offered by external agency, the concerned department shall mark attendance of the student for the remaining courses in that semester excluding the skill course in all the calculations of mandatory attendance requirements upon producing a valid certificate as approved by the College.

**11. Massive Open Online Courses (MOOCs):**

A Student has to pursue and complete one course compulsorily through MOOCs approved by the Institution. A student can pursue courses other than core through MOOCs and it is mandatory to complete one course successfully through MOOCs for awarding the degree. A student is not permitted to register and pursue core courses through MOOCs.

A student shall register for the course (Minimum of either 8 weeks or 12 weeks) offered through MOOCs with the approval of Head of the Department. The Head of the Department shall appoint one mentor to monitor the student's progression. The student needs to earn a certificate by passing the exam. The student shall be awarded the credits assigned in the curriculum only by submission of the certificate. Examination fee, if any, will be borne by the student.

Students who have qualified in the proctored examinations conducted through MOOCs platform can apply for credit transfer as specified and are exempted from appearing internal as well as

external examination (for the specified equivalent credit course only) conducted by the

#### **4.0 ATTENDANCE**

A student shall be eligible to write University examinations if he acquires a minimum of 75% of attendance in aggregate of all the subjects/courses, and with minimum 50% in each and every course including practicals.

Condonation of shortage of attendance in aggregate up to 10% (65% and above and below 75%) in each semester shall be granted by the College Academic Committee.

Shortage of Attendance **below** 65% in aggregate shall not be condoned and not eligible to write their end semester examination of that class.

Students whose shortage of attendance is not condoned in any semester are not eligible to write their end semester examination of that class.

A prescribed fee shall be payable towards Condonation of shortage of attendance.

A student shall not be promoted to the next semester unless, he satisfies the attendance requirement of the present semester, as applicable. They may seek re-admission into that semester when offered next. If any candidate fulfills the attendance requirement in the present semester, he shall not be eligible for re-admission into the same class.

#### **5.0 EVALUATION**

The performance of the candidate in each semester shall be evaluated subject-wise, with a maximum of 100 marks for theory and 100 marks for practical, on the basis of Internal Evaluation and End Semester Examination.

For the theory subjects 75 marks shall be awarded based on the performance in the End Semester Examination and 25 marks shall be awarded based on the Internal Evaluation. The internal evaluation shall be made based on the **average** of the marks secured in the two Mid Term-Examinations conducted-one in the middle of the Semester and the other immediately after the completion of instruction. Each midterm examination shall be conducted for a total duration of 120 minutes with 4 questions (without choice) each question for 10 marks, and it will be reduced to 25 marks. End semester examination is conducted for 75 marks for all FIVE (5) questions (one question from one unit) to be answered (either or).

For practical subjects, 75 marks shall be awarded based on the performance in the End Semester Examinations and 25 marks shall be awarded based on the day-to-day performance as Internal Marks. The internal evaluation based on the day to day work-5 marks, record- 5 marks and the remaining 15 marks to be awarded by conducting an internal laboratory test. The end examination shall be conducted by the examiners, with a breakup marks of Procedure-20, Experimentation-30, Results-10, Viva-voce-15.

For Mini Project with Seminar, a student under the supervision of a faculty member, shall collect the literature on a topic and critically review the literature and submit it to the department in a report form and shall make an oral presentation before the Project Review Committee consisting of Head of the Department, supervisor/mentor and two other senior faculty members of the department. For Mini Project with Seminar, there will be only internal evaluation of 100 marks. A candidate has to secure a minimum of 50% of marks to be declared successful.

A candidate shall be deemed to have secured the minimum academic requirement in a subject if he secures a minimum of 40% of marks in the End semester Examination and a minimum aggregate of 50% of the total marks in the End Semester Examination and Internal Evaluation taken together.

In case the candidate does not secure the minimum academic requirement in any subject (as specified in 5.4) he has to re-appear for the End semester Examination in that subject. A candidate shall be given **one** chance to re-register for each subject provided the internal marks secured by a candidate **are less than 50% and has failed in the end examination.** In such a case, the candidate must re-register for the subject(s) and secure the required minimum attendance. The candidate's attendance in the re-registered subject(s) shall be calculated separately to decide upon his eligibility for writing the end examination in those subject(s). In the event of the student taking another chance, his internal marks and end examination marks obtained in the previous attempt shall stand cancelled. For re-registration the candidates have to apply to the University through the college by paying the requisite fees and get approval from the University before the start of the semester in which re-registration is required.

In case the candidate secures less than the required attendance in any re-registered subject(s), he shall not be permitted to write the End Examination in that subject. He shall again re-register the subject when next offered.

Laboratory examination for M. Tech. courses must be conducted with two Examiners, one of them being the Laboratory Class Teacher or teacher of the respective college and the second examiner shall be appointed by the University from the panel of examiners submitted by the respective college.

## **6.0 EVALUATION OF PROJECT/DISSERTATION WORK**

Every candidate shall be required to submit a thesis or dissertation on a topic approved by the Project Review Committee.

A Project Review Committee (PRC) shall be constituted with Head of the Department and two other senior faculty members in the department.

Registration of Dissertation/Project Work: A candidate is permitted to register for the project work after satisfying the attendance requirement of all the subjects, both theory and practical.

After satisfying 6.2, a candidate has to submit, in consultation with his project supervisor, the title, objective and plan of action of his project work for approval. The student can initiate the Project work, only after obtaining the approval from the Project Review Committee (PRC).

If a candidate wishes to change his supervisor or topic of the project, he can do so with the approval of the Project Review Committee (PRC). However, the PRC shall examine whether or not the change of topic/supervisor leads to a major change of his initial plans of project proposal. If yes, his date of registration for the project work starts from the date of change of Supervisor or topic as the case may be.

Continuous assessment of Dissertation-I and Dissertation-II during the Semester(s) will be monitored by the PRC.

A candidate shall submit his status report in two stages to the PRC, at least with a gap of 3 months between them.

The work on the project shall be initiated at the beginning of the II year and the duration of the project is two semesters. A candidate is permitted to submit Project Thesis only after successful completion of theory and practical course with the approval of PRC not earlier than 40 weeks from the date of registration of the project work. The candidate has to pass all the theory and practical subjects before submission of the Thesis.

Three copies of the Project Thesis certified by the supervisor shall be submitted to the College/School/Institute.

The thesis shall be adjudicated by one examiner selected by the University. For this, the Principal of the College shall submit a panel of 5 examiners, eminent in that field, with the help of the guide concerned and head of the department.

If the report of the examiner is not favorable, the candidate shall revise and resubmit the Thesis, in the time frame as decided by the PRC. If the report of the examiner is unfavorable again, the thesis shall be summarily rejected. The candidate has to re-register for the project and complete the project within the stipulated time after taking the approval from the University.

The Head of the Department shall coordinate and make arrangements for the conduct of Viva-Voce examination.

If the report of the examiner is favorable, Viva - Voce examination shall be conducted by a board consisting of the Supervisor, Head of the Department and the Examiner who adjudicated the Thesis. The Board shall jointly report the candidate's work for a maximum of 100 marks.

If the report of the Viva -Voce is unsatisfactory (i.e., <50 % of marks), the candidate shall retake the Viva-Voce examination, only after three months. If he fails to get a satisfactory report at the second Viva-Voce examination, the candidate has to re-register for the project and complete the project within the stipulated time after taking the approval from the University.

### **7.0 Cumulative Grade Point Average (CGPA)**

| <b>Marks Range<br/>Theory/<br/>Laboratory<br/>(Max – 100)</b> | <b>Marks Range Mini<br/>Project/Project Work<br/>or Dissertation<br/>(Max – 100)</b> | <b>Letter<br/>Grade</b> | <b>Level</b> | <b>Grade Point</b> |
